

External Roller Blinds

Product Information and Specifications

External Acmeda System

RB10 Heavy Duty Crank Gear System 60mm & 80mm is one of the smoothest Crank Clutch systems available with a 16-22 KG lifting capacity it will handle almost anything. The System is also compatible with not only 50mm but also 40mm motors making it far more cost effective than most externals on the market which are not compatible with 40mm. The Crank System also has a unique bearing pin end which makes it very smooth in operation.

Crank Handles are sold as a fixed to blind option or detachable via a coupling joint meaning multiple blinds can be operated with one Crank.
